

AC650

Quick Start Guide

Designed and Assembled in Richmond, Virginia.

Thank you for choosing AC650

Dear AC650 Owner,

Thank you for choosing the Acoustas AC650. A great deal of thought, time, and care went into creating the amplifier you now own, and it means a lot to us that you selected our work for your audio system. Every AC650 is designed, hand-assembled, and individually tested in Richmond, Virginia using carefully selected components from around the world. Your amplifier also includes AirDSP by Acoustas, our free control and tuning app for setup, source selection, volume, tone control, crossovers, equalization, gain, polarity, and time delay. To get the most from your AC650, we invite you to join our community forum at forum.acoustas.com, where AC650 owners, audio enthusiasts, and industry professionals share knowledge, ideas, and support.

Thank you again for your purchase. We hope you enjoy it.

Connect the AC650 to Wi-Fi

To control your AC650 with the AirDSP by Acoustas app, connect the amplifier to your Wi-Fi network. If you change your Wi-Fi name or password, press the Wi-Fi Reset button on the back of the AC650, then reconnect it through the app.

Note: The AC650 connects to 2.4 GHz Wi-Fi networks.

1

On the back of the AC650, press the Wi-Fi Reset button to enter pairing mode.

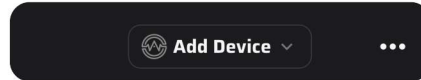

2

Make sure Bluetooth is turned on during setup.

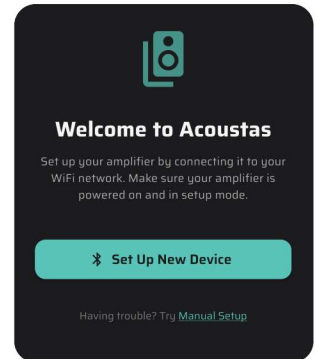

Open the app and tap Add Device at the top of the screen.

3

Open the AirDSP by Acoustas app, tap Set Up New Device, and follow the prompts.

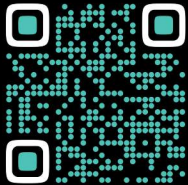

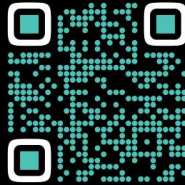

AirDSP by Acoustas

Download the AirDSP by Acoustas to control, configure, and tune your AC650 over Wi-Fi. With the app, you can control power, source selection, volume, tone controls, channel routing, crossovers, equalization, gain, polarity, and time delay.
